UNBEATABLE LOW PRICES! FACTORY DIRECT!

BULK SEED? HANDLE IT THE SUDENGA WAY...

Bulk Seed Tenders:

267 cu. ft. (200+ bushel) capacity in two compartments.
5.5 HP Honda engine powers the patented cleated belt
conveyor for a self contained, fast, but gentle loading
system. Unique stowing conveyor provides trouble free
transport and a compact footprint, taking up less space
when stored.

Gravity Wagon Augers and Conveyors:

Choose from steel, bristle or poly cup flight augers. 12'
through 18' lengths reach the tallest planters. Cleated belt
conveyors handle seed quickly but gently. There is a
difference, don't settle for cheap imitations. Sudenga
Augers & Conveyors are simply the best.

CHIEF
Agri/Industrial Division

The TITAN of the Industry

Chief now offers stiffened farm bins with
all the superior strength of our
TITAN commercial bins!

- The exclusive TITAN W-configured staggered stiffener system provides additional strength to the bin walls and is almost twice as strong as the closest competing stiffeners.
- The fully galvanized unstructured roofs have large fill openings and are available with "J" or "V" rib designs.
- Our exceptionally strong anchor brackets provide strong resistance to lateral movement and uplift.
- Standard G115 galvanization, provides over 25% more corrosion

protection than the G90 industry standard.

- The fully galvanized door has a large 26" x 62" obstruction-free opening and an easy-latch system which allows entry without the need for any tools. A lockable outside panel secures and protects the contents against unauthorized entry.
- Titan stiffened farm bins are backed by a 5-year limited warranty and Chief's 50-plus years of proven performance on the farm.
